REVERSE SKIN AGING WITH PEPTAN®

Today we understand that beautiful skin on the outside requires a healthy foundation on the inside. Peptan collagen peptides are the first nutri-cosmetic ingredient to show skin-restructuring effects, as proven in the Journal of Cosmetic Dermatology.

PEPTAN® COLLAGEN PEPTIDES’ PROVEN ANTI-AGING EFFECTS

1. **Restructure Collagen**
   - A randomized, placebo-controlled double-blind clinical trial showed a decrease in skin collagen fragmentation and an improvement in skin collagen density after 12 weeks of Peptan intake.
   - **Improvement in skin collagen density:** 9%
   - **Decrease in skin collagen fragmentation:** 31%

2. **Increase Skin Hydration**
   - A randomized, placebo-controlled double-blind clinical trial showed that after 8 weeks of Peptan intake, the skin hydration level is higher.
   - **Higher skin hydration level:** 28%

3. **Stimulate Hyaluronic Acid and Collagen Synthesis**
   - Demonstrated in an ex vivo study, Peptan stimulates collagen production and moisture by increasing the amount of water-binding hyaluronic acid in the epidermis.
   - Peptan strongly increased the amount of hyaluronic acid present in the epidermis.

A natural, bioactive protein with neutral taste and odor, Peptan® is your active ingredient of choice for nutricosmetic applications.
